

CompuCom Enterprise Solutions: HP Networking Boot Camp

The HP Networking Boot Camp from CompuCom is designed to provide networking professionals with hands on configuration and operational experience using HP Networking equipment in a comprehensive data center reference architecture environment.

Learn HP Networking and Grow Your Skills

With the growing trend of CIOs looking at the strategic advantage of introducing a second vendor into the enterprise network, it is essential that network architects and administrators have a way to quickly adopt new skills to help evaluate and possibly manage new devices in their network. CompuCom has developed this unique Technical Boot Camp tailored to the needs of experienced networking professionals to quickly learn the features, benefits, and operation of HP Networking hardware and software.

The HP Networking Boot Camp is a small group, hands-on experience, with no more than six participants in attendance to maximize the opportunity for personal development and hands on interaction with new technologies. CompuCom Solution Architects conduct the one and a half-day session at our Enterprise Solutions Center in our Dallas, TX, Headquarters office, where we have built an expansive multivendor lab environment, complete with an HP Networking infrastructure in a reference architecture configuration.

Service Summary

Expert CompuCom network consultants will provide you knowledge, best practices, and hands-on training with HP Networking technologies in a reference architecture environment.

For details on this and our other services, contact your Account Executive, visit us on-line at CompuCom.com or call +1 800.225.1475
