

CompuCom Powers IT Asset Disposition

Every day, your IT assets grow older. You contemplate the regulations and restrictions for disposal, the costs involved and the vast number of providers that provide some, but not all, services. As your assets age, your challenge becomes how to effectively dispose or redeploy them.

The risks and consequent costs of improper IT asset disposition fall into two main categories: security (e.g. exposure of sensitive corporate data) and environmental such as former corporate IT assets ending up as hazardous material in a landfill. The U.S. Environmental Protection Agency (EPA) estimates that less than a third of U.S. IT electronic products that are ready for end-of-life management are properly disposed.

While there are numerous providers offering disposal and recycling services, many of them have little or no integration of systems and enterprise asset management processes.

A Dynamic Approach

To address this need, CompuCom® provides IT Asset Disposition (ITAD) Services that use a dynamic service model supported by a governance organization. We apply a structured qualification matrix to your project and define the most efficient delivery model relying on a nationwide network of facilities, resources, tools, systems, logistics and partners.

If you had to do it yourself, you might adopt a one-approach-fits-all approach due to cost constraints. Our dynamic approach helps you better manage your cost while minimizing risks, maximizing asset sustainability and optimizing the residual value of your assets.

Corporate Sustainability Goals

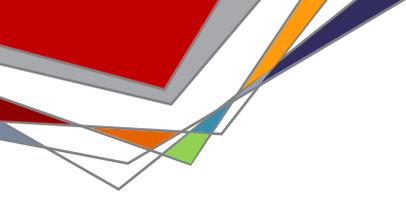

We are committed to improving the world we live in through our sustainability programs, which are focused on developing and implementing green projects for our clients, partners and our organization. We work to reduce our usage of natural resources, and recycle waste generated across our facilities limiting the impact to landfills.

INVEST IN THE SAVINGS — NOT THE TIME

- **YOU IDENTIFY THE ASSETS**
- **WE MANAGE THE DISPOSITION**
- **YOU REAP THE BENEFITS**

CompuCom®

Our Services

We have 3 large-scale service locations in North America and a national network of certified partners with more than 25 processing centers across North American and Canada. We also have over 6,000 field service technicians. Our services include:

Asset De-installation

The decommissioning of hardware from the business environment including disconnecting, unplugging, packaging and physical removal.

Secure Data Destruction

Our services are supported by detailed processes to securely handle, remove and destroy all proprietary data. We can physically shred hundreds of hard drives per hour on site with a client witness or off site at our secure facility and dispose of the materials through environmentally certified processes. We can also wipe or degauss hard drives for the complete removal of data. We can remove data and software from all devices that store information on PCs, servers, printers, tablets and smartphones.

Logistics

The secure, physical transport of hardware from one location to another. Logistics consists of trafficking, packaging, storage and transportation.

Asset Refurbishment and Recycling

The refurbishment of assets to extend the life of the hardware, making the product available for redeployment within the client's environment.

Asset Remarketing

The resale and/or donation of client assets for shared monetary proceeds or goodwill.

Our companies and our technicians hold more than 100,000 certifications, including ISO 9001:2008 and ISO 20000. Additionally, through our ITAD Services, we:

- Process more than 1 million plus assets per year
- Manage donations and disaster relief support of 75,000+ assets per year on behalf of our clients
- Sell more than \$2 million of used scrap equipment per year
- Return, on average, more than \$6.8 million to our clients

We use EPA-certified recycling suppliers, and the national network of processing centers that we use maintain a wide range of industry certifications, including R2, eStewards and NAID. Your assets are transported and processed with security and compliance as our top priorities.
