

# ENGINEER, FURNISH & INSTALL

FOCUS ON YOUR BUSINESS AND LET COMPUCOM<sup>®</sup> EF&I DESIGN, BUILD AND MAINTAIN THE NETWORK INFRASTRUCTURE THAT SUPPORTS YOUR CUSTOMERS

## ADVANCED NETWORK INFRASTRUCTURES

Offering the best connectivity possible to your customers and end users is vital to your company. From network health checks and site surveys – to high- and low-level network design and configuration development – **CompuCom EF&I** provides oversight of all phases of your network infrastructure installation. Just as rapid innovation in conventional and alternative energy sources is creating a need for utility grid enhancement, the explosive growth in connected devices calls for major investment in network infrastructure.

CompuCom EF&I configuration process is performed in a centralized, controlled environment using ISO 9001-certified processes.

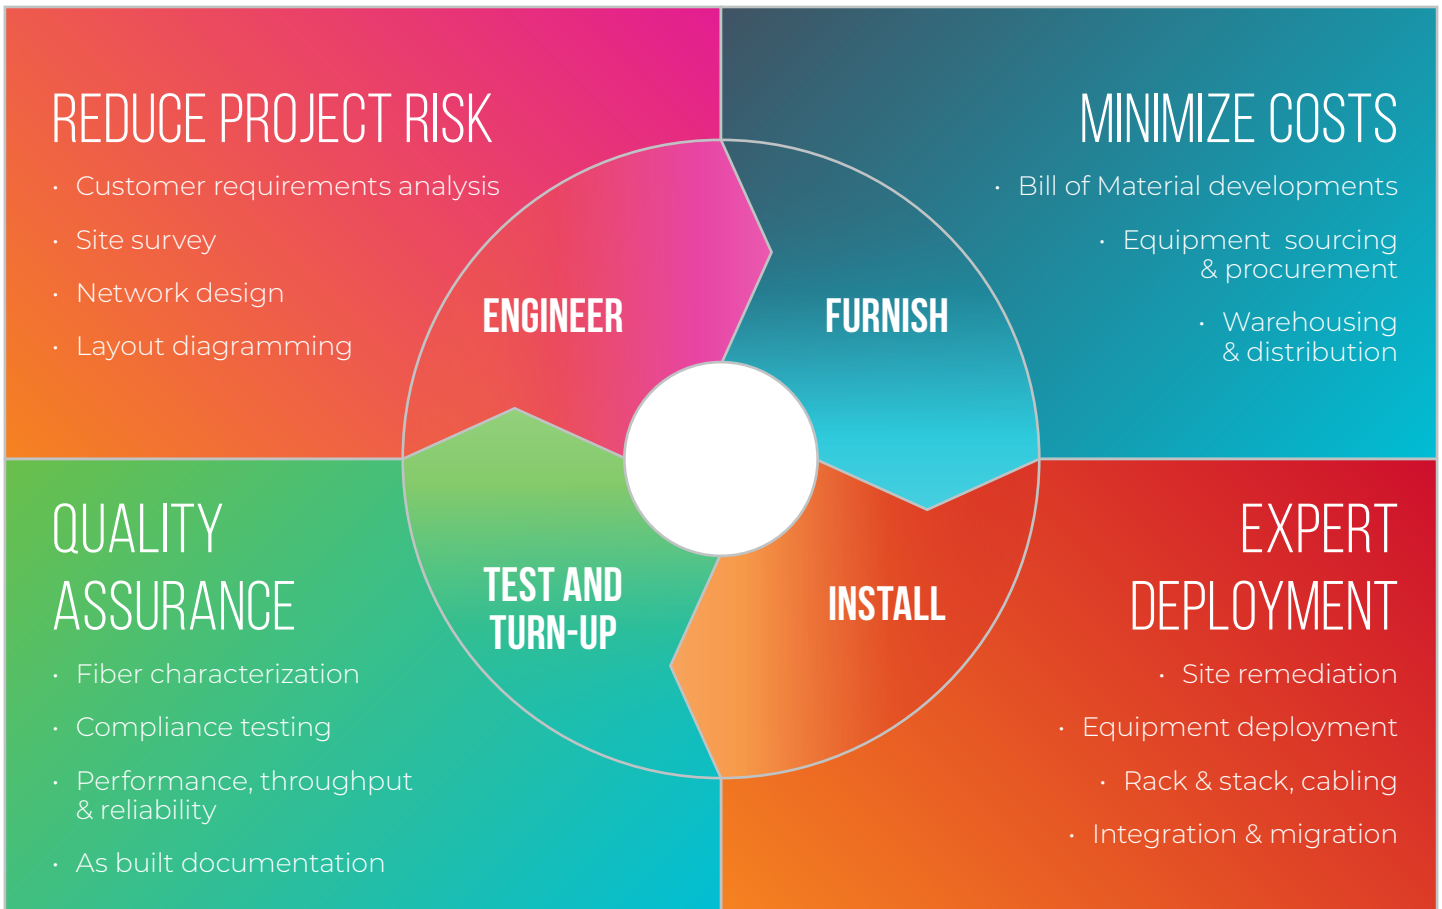

Whether you need our team of field technicians performing maintenance checks on radio networks for lineworkers to ensure your electric or wind power infrastructure stays connected – or you need to offer your customers reliable and fast service internet and cellular service – our network of certified engineers provide the latest network infrastructure technology to deliver end-to-end telecommunication networks for central offices, data centers and utility providers.

By 2020, the number of connected devices per person is expected to be 6.58, resulting in about 50 billion connected devices worldwide<sup>1</sup>. Is your network ready?

CompuCom EF&I provides **advanced, fast and reliable** network infrastructure services including:

- Site surveys and material procurement
- Device configuration, including data and/or power cabling
- Rack and stack, including hardware test and turn-up
- As-built documentation and Telcordia GR-1275 compliant on-site installations
- Inspection and sign-off for every data cable, relay rack, network device, power cable, ground cable and termination point
- Installation and testing of every device during staging and after it's installed at your facility

**CompuCom<sup>®</sup>**

## FAST, SAFE AND CARRIER INDEPENDENT

Our advanced EF&I services function with most major, wire-line and wireless service providers – carrier class equipment manufacturers – and include:

- Bill of material validation, handling, logistic and third-party equipment and procurement
- Digital birth certificate for every compatible system configured
- Detailed hardware and software information and a complete inventory of all software products
- 20+ years of experience delivering EF&I
- Ongoing support services including other adjacent services
- Cisco® Gold Partner

Call us at **1-800-350-8430** to learn more about how our comprehensive EF&I benefits your organization.
