

FUTURE PROOF EDUCATION

DRIVE COLLABORATION, SAFETY AND
SECURITY BY MODERNIZING YOUR
SCHOOL'S TECHNOLOGY INFRASTRUCTURE

MODERNIZE YOUR SCHOOL

Legacy systems and old technology infrastructure within schools inhibit innovation and modernization. From K-12, through higher education, CompuCom® helps schools keep pace with advances in technology by modernizing their environment and building a scalable foundation that leads to new technologies including collaboration, safety, and security.

On average, school buildings are **44 years old** and an estimated **53 percent** of schools needed to modernize.¹

EDUCATION TECHNOLOGY SOLUTIONS FEATURES:

Foundational Infrastructure to Future Proof Your School

Educators and administrators need the support that comes with technology that enables communication, collaboration, safety and flexibility.

- Our routers, network devices, wireless backup and network security solutions ensure connectivity and simplicity
- Increased productivity solutions for educators, administrators and students includes remote access to school networks for staff and students
- Modern infrastructure solutions that drive interactive, fast and dynamic school Website and intranet content
- Solutions that provide fast, wireless internet networks for educators and administrators and monitor Websites students and staff visit, while working with third-party partner solutions to block inappropriate content and sites

¹Condition of America's Public School Facilities

Technology that Drives Collaboration

Break through the cinder blocks and turn classrooms into productivity centers. Solutions like Cisco WebEx® Meeting Center™ or Google® Classroom help teachers stay organized, save time and increase student engagement.

- Always-on messaging and file sharing lets educators talk with each other whenever and wherever they need to
- Student workspaces with video calling and screen share help administrators and educators collaborate without having to move classrooms or shuffle through hallways.
- Get up and running faster with solutions that work with Google Chromebooks, tablets and mobile phones
- Support for online and remote learning help sick students keep up or catch up with the click of a button
- Centralize staff scheduling for coordinating meetings provide an easy-to-use, online calendar

Safety and Security, the New Norm

The concerns around safety and security in and around our schools has taken center stage. CompuCom believes in the importance of technology solutions that provide another level of security and safety for teachers, students and administrators. We provide a suite of safety and security solutions that provide schools with options including:

- The ability to alert the staff and authorities at the touch of a button
- The capability of locking all doors with the touch of a button
- Immediate location of any danger or threat
- Lighting that automatically changes within each hallway to signify "safe" (green) or "avoid" (red)
- Centralized and automated operations, like locking all building doors, which saves two to four hours a day on formerly manual tasks
- Actionable intelligence and incident reporting
- Single pane of glass view of all school operations that can be accessed from anywhere at anytime from a mobile application

Contact CompuCom today at **1-800-350-8430** for an assessment that leads to a more connected, more collaborative and safer school.
